Performance Summary

The Blue Point model portfolio, which is applied to separately managed accounts, returned 6.95% net of fees during the third quarter. The Total Return of the S&P 500, which includes dividends, was 3.85% during the third quarter. Blue Point outperformed the benchmark by 3.10% during the third quarter. Year-to-date, Blue Point has returned 5.25% net of fees, while the Total Return of the S&P 500 has been 7.84%.

Following the election, profits were taken in technology, and over 15% of portfolio cash was invested in financials, infrastructure, defense and healthcare companies. The election represented a dramatic regime shift that bodes well for investment and growth.

Graph footnote: Total Return (TR), includes the reinvestment of dividends.

Disclosures: Performance of the separate accounts can differ substantially from the actual performance of Blue Point, the model portfolio, due to timing of entry, whether account is taxable or non-taxable, and the timing of withdrawals. Returns include accrued income since 9/30/14. Past performance does not guarantee future results. The management fee schedule is as follows: 1.2% on first \$1 million, 1.0% on the next \$3 million, 0.85% on next \$5 million. Depending on circumstances, institutional fee schedules may be negotiated. Blue Point Investment Management, LLC, is a Maryland registered investment adviser. To receive a copy of the firm's Form ADV Part 2, call Blue Point at 443-600-8050.

Market Outlook

Challenges for Technology Companies -

Valuations of technology companies are challenged since they must now compete with financials, infrastructure, defense and healthcare companies for capital. Technology companies are also almost completely dependent on China for produced goods. This creates supply chain risk as trade disputes and agreements are renegotiated.

▶ Regulatory Relief – Corporate America has been drowning in ever increasing regulation. Rationalizing regulatory rules will not only improve productivity, but will also increase the strength of capital markets. The Dodd Frank Act has a critical flaw that must be reversed: prohibitions against market makers. As flash crashes have shown, there are fewer market makers to take the other side of trades when all the high frequency trading algorithms simultaneously sell.

- **Ships Passing in the Night** − As China moves further into a bureaucratic quagmire, the U.S. is moving towards much needed economic reform. This reform sets the stage for productivity gains, capital repatriation, and economic growth. If pitfalls can be avoided, the U.S. has the potential of becoming an infrastructure growth story.
- **►** A New Cost The demand for capital is fundamentally changing as capital markets prepare for both public and private sector investment. Excessively indebted governments and private sector balance sheets will be challenged by increasing interest expenses.
- ▶ Bond Market Losses Higher interest rates will dramatically erode the value of long-dated fixed-income securities. Printed money will dilute the value of fixed-income securities when interest rates and inflation increase.

A Global Perspective

Blue Point Investment Management offers equity-oriented growth with a global perspective. The investment discipline seeks Growth at a Reasonable Price. Each client account is managed separately.

The Growth At a Reasonable Price (GARP) investment strategy is a blend of active growth and value investing. As a rule, value investors focus on the price of the security, the numerator of the P/E ratio, while growth investors focus on earnings offered by the security, the denominator of the P/E ratio. GARP represents a blended approach and is often referred to as a market-oriented investment strategy.

Through macro-economic research sustainable long-term trends are identified. Then fundamental research is used to identify the best companies that stand to benefit from favorable trends. Investments are geared towards long-term value creation while preserving capital.

Blue Point seeks equity-oriented growth while actively managing the downside risk. Under normal circumstances, Blue Point invests at least 60% of its net assets in domestic U.S. securities. This global approach offers significant investment opportunities here and abroad. In times of market crisis,

adjustments to portfolio holdings will be made that best serve the preservation of capital while seizing investment opportunities.

Each separately managed account stays in the client's name providing complete transparency. Blue Point receives no commissions or compensation that create conflicts of interest. To further ensure the alignment interests Blue Point's portfolio manager invests in the same model portfolio as clients. Blue Point seeks equity-oriented growth with a global perspective, while offering a portfolio manager you know and trust.

Blue Point's Nine Year Performance

	2007	2008	2009	2010	2011	2012	2013	2014	2015
Blue Point Total Return net of fees	23.04%	-28.78%	44.08%	17.26%	-4.55%	21.69%	37.05%	0.12%	5.27%
